

A scatter plot showing the relationship between Sampling Rate (x-axis, 0.0 to 1.0) and Error (y-axis, 0 to 10) for the 'error' variable. The plot features a dashed horizontal line at y=0. Data points are colored red for values below 4 and pink for values above 4. Most points are clustered at low sampling rates, with a few points at higher rates (0.3, 0.6, 1.0) all having zero error.

A scatter plot showing the relationship between the Sampling Rate (x-axis, ranging from 0.0 to 1.0) and the Standard Deviation Among Winner Forecasts (y-axis, ranging from 0.0 to 0.5). The data points are represented by red circles. A dashed black line indicates a trend that starts at approximately 0.24 at a sampling rate of 0.0, peaks at about 0.42 at a sampling rate of 0.05, and then drops sharply to 0.0 by a sampling rate of 0.15, remaining at 0.0 for higher sampling rates.
